SUMMARY

Full Stack Software Developer (B.Tech CSE, GLA University, 2027) with a strong foundation in Data Structures & Algorithms (500+ problems solved on LeetCode) and hands-on experience building scalable web applications using JavaScript, Node.js, Express.js, and MongoDB. Skilled in RESTful API design, database schema architecture, and Agile collaboration. Seeking a Software Engineer / Full Stack Developer role at Infosys.

EDUCATION

GLA University, Mathura, Uttar Pradesh

2023 – 2027

Bachelor of Technology (B.Tech) – Computer Science & Engineering | CGPA: 7.37 / 10

12th (Senior Secondary): 74.33% | 10th (Secondary): 71.33%

TECHNICAL SKILLS

Languages: JavaScript, Java (Intermediate), Python (Intermediate), C (Basic)

Frontend: HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MongoDB Atlas, SQL

System Design: HLD Fundamentals, API & DB Schema Design (SQL & NoSQL), Caching & Load Balancing

Tools & Practices: Git, GitHub, VS Code, Postman, Agile/Scrum, SDLC, Unit Testing

Core CS Subjects: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

PROJECTS

TaskFlow – Full-Stack Task Management Web App

React (Vite), Node.js, Express.js, MongoDB Atlas, JWT Auth

GitHub: github.com/lakshita3103/task-management-webapp

- Owned backend architecture for a 5-member Agile team building a Kanban-style task manager with boards, lists, and task cards supporting due dates and priority levels.
- Implemented JWT-based authentication (register, login, logout, session persistence) securing board- and task-level access for all users.
- Migrated the database layer from local MongoDB Compass to MongoDB Atlas, enabling shared cloud access and multi-device usage across the team.
- Built board-creation functionality end-to-end (8+ REST API endpoints + React UI) and added unit test coverage validating core API behavior before deployment.

Zenvyra – Full-Stack Social Blogging Platform

Node.js, Express.js, MongoDB, REST APIs, JavaScript

GitHub: github.com/Krish7941/Zenvyra---The-Social-media-Application

- Engineered the backend for a blog-style social platform enabling users to create, edit, and manage posts with persistent MongoDB storage.
- Designed and implemented RESTful CRUD APIs for post creation, likes, and per-user post tracking using Node.js and Express.js.
- Structured 3 normalized MongoDB schemas (Users, Posts, Likes) with indexed fields to support efficient user-post relationship queries at scale.

MoodFit – AI Stylist Based on Mood & Weather

Python, OpenCV, FER, Google Gemini API, OpenWeather API, JavaScript

GitHub: github.com/ZENINxOMEGA/Gen-Ai-Project

- Collaborated in a 4-member team to build a GenAI-powered virtual stylist recommending outfits based on real-time mood and live weather conditions.
- Built facial emotion recognition (FER + OpenCV) via webcam input, combined with live OpenWeather API data, and integrated Google Gemini LLM calls to generate personalized outfit and color palette suggestions.

CERTIFICATIONS

- Generative AI — Coding Blocks (Completed)
- Prompt Engineering for ChatGPT — Great Learning (Completed)

ACHIEVEMENTS

- Solved 500+ Data Structures & Algorithms problems on LeetCode — leetcode.com/u/krish07x
